Video Script

AI at Work: Think Before You Prompt

Version: 1.1 — Final Production Script
Language: English (US)
Format: AI-generated instructional video
Production tool: Synthesia
Learning development tool: DiscereNow
Target audience: Corporate professionals
Estimated duration: 75–90 seconds

1. Instructional Overview

Learning Context

Generative AI tools can improve workplace productivity, but sharing confidential information with unauthorized platforms may introduce security, privacy, and compliance risks.

This video presents a realistic workplace scenario involving an employee facing a tight deadline and considering the use of a public AI chatbot to summarize confidential business information.

Learning Objective

By the end of the learning experience, participants will be able to identify potential risks of sharing sensitive corporate information with unapproved generative AI tools and select a safer course of action.

Instructional Strategy

Scenario-based learning with a decision point.

The video introduces the situation, highlights relevant risks, and concludes with an unresolved decision. Learners then apply their understanding through an interactive knowledge check in DiscereNow.

The correct response is intentionally withheld until the interactive activity.

---

2. Video Script and Storyboard

SCENE 01 – The Deadline

Estimated duration: 13–16 seconds

Visual Composition

- AI presenter (Theo) seated in a contemporary corporate office.
- Full-screen office background.
- Dark blue title panel positioned in the lower-left area.

On-screen text:

MEET ALEX
One report. One deadline.

Narration:

"Meet Alex. An important client meeting starts in thirty minutes, and there's still a lengthy project report to summarize.

With the clock ticking, Alex needs a faster way to get things done."

Instructional Purpose

Establish the workplace context, time pressure, and motivation for using generative AI.

SCENE 02 – The Shortcut

Estimated duration: 15–19 seconds

Visual Composition

- Light-gray background with a dark blue section heading.
- Custom chatbot interface mockup.
- AI Assistant greeting message.
- Confidential report displayed as an attachment.
- Prompt field and Send button.

On-screen text:

A FASTER WAY?

AI Assistant:
How can I help you today?

Attachment: Project Report – Confidential

Prompt:
Summarize this report into five key points for my meeting.

Button: Send

Narration:

"Alex considers using a public generative AI chatbot. With just one prompt, it could turn pages of information into a concise summary.

It sounds like the perfect shortcut. But there's something Alex hasn't considered."

Instructional Purpose

Introduce generative AI as a productivity tool and establish the potential risk associated with uploading an internal document.

SCENE 03 – The Hidden Risk

Estimated duration: 25–30 seconds

Visual Composition

- Light-gray background.
- Dark blue section heading.
- Central information panel showing a confidential report.
- Three information categories accompanied by red warning icons.
- Yellow document illustration labeled Confidential.

On-screen text:

NOT ALL DATA IS SAFE TO SHARE

- Client information
- Financial data
- Internal project details

Document label:
CONFIDENTIAL

Attachment:
Project Report

Narration:

"The report contains confidential client information, financial data, and internal project details.

Sharing this information with an unapproved AI service could expose sensitive business data to external systems, potentially compromising client confidentiality, violating company policies, and creating security risks.

Even when the goal is simply to work faster, a single prompt can have consequences beyond the immediate task."

Instructional Purpose

Help learners recognize categories of sensitive information and understand possible consequences of sharing them with unauthorized AI systems.

The visual representation reinforces the three categories without requiring learners to read the entire narration on screen.

SCENE 04 – The Decision

Estimated duration: 12–16 seconds

Visual Composition

- AI presenter (Theo) in the corporate office environment.
- Custom chatbot interface displayed on the right.
- Confidential report attachment and previously introduced prompt.
- Yellow Send button emphasizing the pending action.
- Dark blue heading containing the final decision question.

On-screen text:

WHAT WOULD YOU DO?

AI Assistant:
How can I help you today?

Attachment: Project Report – Confidential

Prompt:
Summarize this report into five key points for my meeting.

Button: Send

Narration:

"Alex has the prompt ready. One click could save valuable time.

But should this information be sent to the chatbot?

What would you do in Alex's position?"

Instructional Purpose

Return to the interface introduced in Scene 02, establishing visual continuity.

The highlighted Send button emphasizes the moment of decision. The video ends without revealing the correct action, transitioning directly to the interactive activity.
